

## Thank You for Visiting Our Booth at AHR Expo 2024

Regarding the recent “AHR Expo 2024” held in Chicago, USA, we wholeheartedly thank you for visiting our booth despite your busy schedule. Thanks to your support, we successfully concluded the exhibition.

At our booth, we showcased small and high-capacity PCB relays (BR Series) compatible with low-GWP refrigerants, heat pumps, and inverter machines. Additionally, we displayed magnetic contactors. We hope you found our offerings satisfactory.

Moving forward, our team remains committed to providing control components for air conditioning and refrigeration products that meet your expectations. Whether it is PCB relays or magnetic contactors, please feel free to reach out if you encounter any difficulties.
